

## Floor Malt

Crisp Malting Group has a long and proud traditional of producing the highest quality floor malt that continues to this day with malt still being produced in our No.19 floor malting at Gt Ryburgh.

We produce small batch, handcrafted malt using techniques which date back to when the malting floors were built in the 1870's.

Our floor malting is one of only a handful still operating within the UK and the malt it produces is highly prized by brewers worldwide.

Floor malted Maris Otter remains the quintessential ale brewing malt.

Although traditional in nature, the malt produced in No.19 is subject to the same stringent process and quality control procedures as the malt produced in our modern malting plants.

A full range of bespoke ale, lager and distilling floor malts plus other malted cereals are made to order and packaged in 25 kg sacks.
